The Growing Darkness

LONG AGO, a prophesy foretold the coming of an individual who would "bring balance to the Force," ushering in a new era of peace following one of great instability. With the Separatist crisis, the future of the great Galactic Republic is clouded with uncertainty and the peace-keeping Jedi are too few to hold together an entire galaxy. In this age, the Sith have reappeared, their evil hidden perhaps in the heart of liberty's citadel—and while the prophecy is looked upon anew, many of the galaxy's denizens have no choice but to fend for themselves.

Beyond the vision of the Jedi Knights, somewhere within the darkness, the greatest master of evil ever to use Sith power bides his time. As his strength grows, his plans begin to shape the course of the galaxy, and his snares await the unsuspecting.

Obi-Wan Kenobi

A DEDICATED JEDI KNIGHT facing a time of great crisis, Obi-Wan Kenobi finds himself at the heart f galactic turmoil as the Republic begins to unravel. Kenobi has witnessed the death of his Master, Qui-Gon Jinn, and nows the challenges the Jedi face in the defense of ustice. He is cautious where his apprentice, Anakin kywalker, is impulsive. Kenobi strives to train his oung Padawan in the discipline that will make him pillar of strength against the dark side of the orce. As dangers unfold around him, Kenobi's bilities and judgment form one of the last ulwarks against the collapse of the Republic.

Obi-Wan's Jedi apprentice is Anakin Skywalker, the boy uspected of being the prophesied individual who can bring balance to the Force." Anakin's independence, born of his late induction into the Order, has brought Kenobi eprimands from Jedi elders Yoda and Mace Windu.

Trailing a would-be assassin into a nightclub on Coruscant, Kenobi steps casually to the bar "to have a drink." As planned, his apparent relaxation draws out his quarry, who finds that the Jedi's extraordinary powers give him a lightning edge—it is virtually impossible to take Obi-Wan by surprise.

Field Agent

Accomplished in a wide variety of skills ranging from diplomacy and psychology to military strategy and hand-to-hand combat, Obi-Wan has to be ready for anything on his field assignments. On Kamino, his investigation bursts into explosive conflict when bounty hunter Jango Fett resists arrest. Covered in armor and weaponry, Fett is a professional at the top of his field, but he cannot overcome Obi-Wan. The best Fett can manage is escape—with a powerful tracer beacon attached to his ship.

TRACER BEACON

Star Tracker

Pursuing Jango Fett across the galaxy, Obi-Wan engages in a space duel with Fett and his deadly spacecraft, *Slave I*. Obi-Wan proves his abilities as an expert pilot and tactician, sacrificing his spare parts in a ruse to put Fett off his trail with apparent explosion debris. From high in orbit, Obi-Wan's top-of-the-line starfighter sensor suite then traces Fett down to the weird planet surface of Geonosis.

STARFIGHTER DISPLAYS

Facing off against Count Dooku, Kenobi wisely exercises restraint where his apprentice rushes in headlong. A Jedi of powerful inner focus, Obi-Wan nevertheless finds he is unprepared for the Count's specialist techniques. Against Kenobi's Form III moves, the Count demonstrates the ancient and elegant precision of Form II lightsaber combat.

Anakin Skywalker

TWENTY-YEAR-OLD Jedi Padawan Anakin Skywalker is gifted with extraordinary Force skills and piloting abilities. His talents make him impatient with Jedi traditions that seem to hold him back and he often disagrees with his more cautious Jedi Master, Obi-Wan Kenobi. Skywalker was accepted into the Order at the age of ten, far later in life than its rules allow, and his emotional bond with his mother was already strong. Unlike other Jedi, Anakin struggles with the pain of this separation. Jedi Council members suspect Anakin of being the prophesied One who can bring balance to the Force. But in an increasingly unbalanced world, Anakin must face ever steeper challenges to master the dangerous force that is himself.

Anakin is capable but not yet professional, criticizing his Master Kenobi in front of their charge, Senator Amidala. Anakin prefers to exceed his and Obi-Wan's mandate to only protect Padmé by trying to discover who is after her.

UTILITY BELT

LIGHTSABER

Most Jedi Padawans build their lightsabers to resemble those of their Masters as a gesture of respect. Anakin constructed his own lightsaber while in a trance-like state, resulting in a design that favors maximum strength.

Blue lightsaber blade generated via traditional Jedi crystals is more maneuverable but slightly less powerful than blade using synthetic Sith crystals

Dark Knight

The tunics, robes, and cloaks worn by Jedi are honored traditions, but not uniforms. From the time they become Padawans, Jedi are free to dress as they choose. Anakin Skywalker breaks with tradition in his garments, both in their color and material. His distinctive dark clothing makes him stand out at the Jedi Temple and draws concern from Jedi elders.

Airspeeder

Anakin is possibly the best pilot ever to train within the Jedi Temple. When he commandeers an airspeeder in pursuit of an assassin on Coruscar his abilities are phenomenal. Anakin violates Jedi policies on vehicular speed and risk—guidelines intended to safeguard other craft, but not designe with so gifted a pilot in mind. Anakin's antics prompt the remark from Obi Wan, "Why do I get th feeling you're going to be the death of me?"

On Coruscant, Anakin suspects that Padmé has feelings fo him. On Naboo, where Anakin's charm is in full force, Padme's feelings become transparent—but the inherent danger of their passions frightens both Senator and Jedi.

Forbidden Feelings

Only 20 Jedi have ever left the Order, but Anakin is coming perilously close. When he is assigned to protect the woman he has loved since childhood, he is torn between love and duty. The Jedi discipline does not seem to help him as it does the others, so his loyalties are put to the test: Will he insist on being an exception to the rules of the Jedi Order?

When Anakin senses his mother in terrible pain, Padmé goes with him to Tatooine in search of her. After Anakin fails to rescue Shmi in time, Padmé must alleviate the Padawan's anger, resentment, and despair.

Zam Wesell

ASN-121
ASSASSIN DROID

AS A CLAWDITE SHAPE-SHIFTER, Zam Wesell can change her appearance to mimic a range of humanoid forms, giving her a special edge as a hired assassin. Zam learned her trade on Denon, the globe-girdling metropolis second only to Coruscant as a center of galactic business. In the high-risk world of industrial espionage, Zam rose from corporate security sergeant to executive bodyguard before seeking higher fees for contract execution and bounty hunting.

For some years Zam has worked on and off with renowned bounty hunter Jango Fett. Her latest job with Fett takes her to Coruscant, where Jango entrusts her with the assignment of killing a prominent Senator. Wesell knows that this opportunity will enhance her reputation and allow her to return to Denon as a master in her field.

Stinger painful but not fatal

Bite delivers lethal nerve poison

Bounty Hunter

A loner with few close associates, Zam Wesell is typical of bounty hunters. She inhabits a gray zone that extends to both sides of the law. Arrogant, highly skilled, and feeling unchallenged by legal bodyguard and security work, Wesell regards bounty hunting as a more suitable channel for her superior talent.

KOUHUNS

Zam uses two deadly kouhuns for her Senatorial assassination job. Small, silent arthropods like the kouhuns of Indoumodo can evade even tight security. Unlike projectiles or energy weapons, they are virtually impossible to trace back to their users. Kouhuns are starved in advance, so they head straight for warm-blooded life forms when released, and use a fast-acting nerve toxin to kill their prey.

CAPE SEAL

Zam's discipline derives from the teachings of the Mabari, an ancient order of warrior-knights on her homeworld. She wears Mabari inscriptions and stylized emblems, including a cape seal that is an ancient Mabari artifact.

To prevent being traced, Zam Wesell prefers to steal a new vehicle for each new job. But when her security depends on performance she uses her own airspeeder.

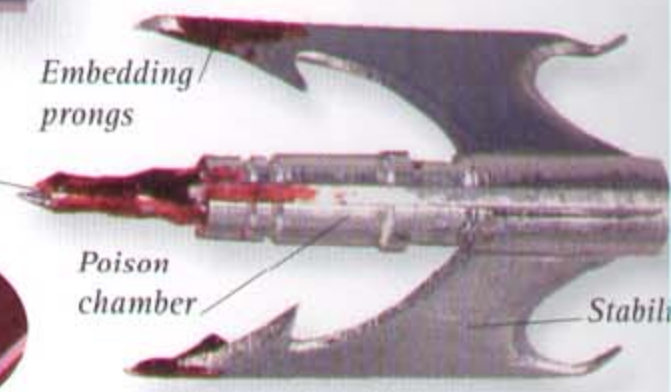
Zam favors her KYD-21 blaster pist for both attack and defense, thoug Jango has begun teaching her that projectile weapons can be useful when working invisibly in the dark.

KYD-21 Blaster

Though she carries a projectile rifle at Jango's insistence, Zam's primary weapon is a compact, precise KYD-21 pistol. She finds she can hide a pistol more easily when she needs to disguise herself as a non-threatening presence in order to close in on her mark.

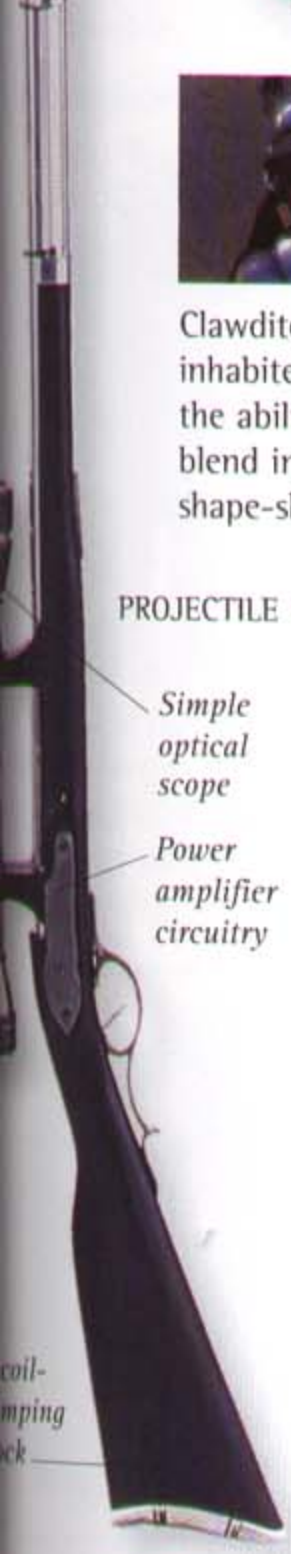
Under intense Jedi mind-pressure, Zam begins to reveal her employer...until she is silenced by an assassin.



SABERDART

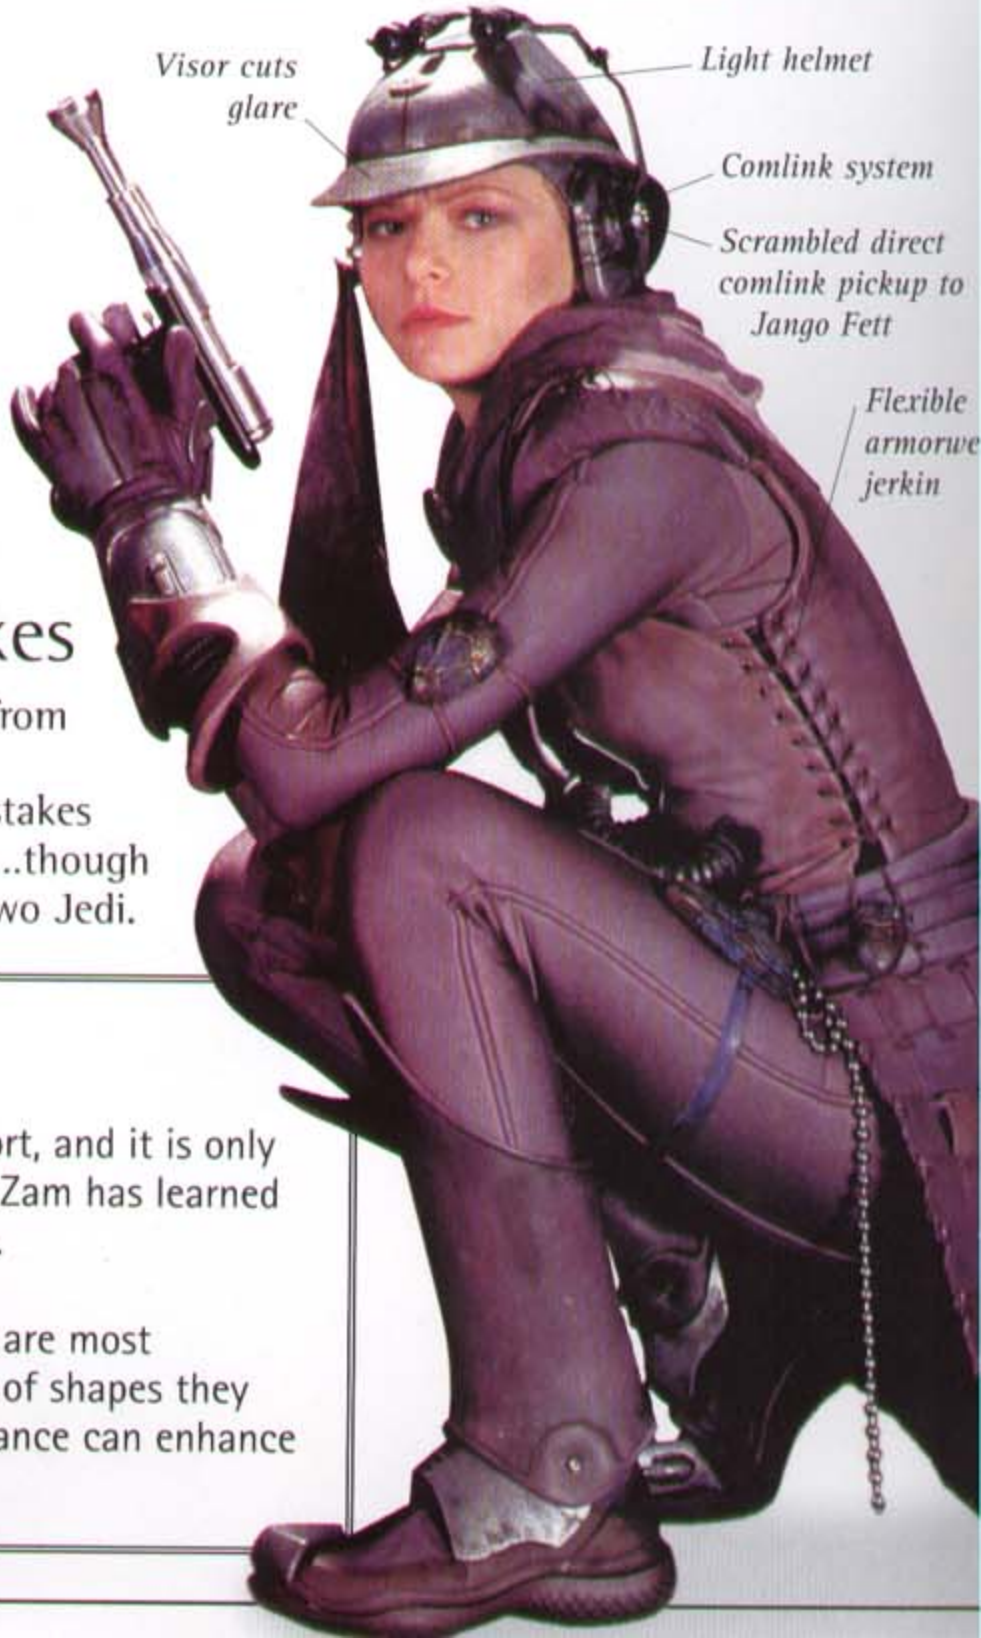
Preferring to leave no trace, Zam dislikes projectile weapons. A saberda such as Jango might use may be sile and highly lethal, but has the potent to lead pursuers back to its source.

Clawdite shape-shifters, or "changelings," evolved on a world inhabited by warring humanoid subspecies. Shape-shifters developed the ability to mimic the appearance of other species in order to blend in without being killed. As a changeling dies, its ability to shape-shift fades and it returns to a neutral Clawdite configuration.



High Stakes

Zam knows that in accepting a risky assignment from Jango Fett, she is in danger of being used as an expendable pawn. Such are the risks of the high-stakes trade in death, and Zam is prepared to take them...though she will find that she is not equipped to outrun two Jedi.



DATA FILE

- Shape-shifting takes effort, and it is only through long practice that Zam has learned to rest in a mimicked form.
- Although shape-shifters are most effective at a limited range of shapes they imitate often, medical assistance can enhance their abilities much further.

Jedi Temple

The Jedi Temple on Coruscant occupies hal sanctified by the noble efforts of Jedi datin thousands of years into remote antiquity.

FOR MILLENNIA the Jedi Temple on Coruscant has served as the training ground and home base of the Jedi Knights, peacekeeping defenders of justice throughout the galaxy. At the Temple, Jedi initiates learn the ways of the Force, a mystical energy field created by all living things. Hundreds of other individuals who are not Jedi Knights provide vital support in everything from operations management to technical analysis. The galaxy is so large that complete law enforcement is impossible; so most Jedi rove through assigned regions on "journey missions," empowered to support justice as they see fit. Jedi based at the Temple travel on special assignments.

Kaminoans

WHEN A GLOBAL CLIMATE SHIFT flooded their planet, the Kaminoans were forced to adapt. They developed cloning technology and practised selective breeding to keep their race alive. As a result of the hardships endured during the Great Flood, the Kaminoans have an austere, non-materialist outlook. They are outwardly polite, yet behind this lurks an extreme intolerance of physical imperfection. The Kaminoans are reliant on certain outworld technologies and raw materials to maintain their advanced society, so they use their cloning abilities to produce goods for export. When a Jedi named Sifo-Dyas placed an order for a massive clone army a decade ago, the Kaminoans embarked upon the largest human cloning project ever undertaken.

The planet Kamino once had extensive land areas, but the melting of inland continental glaciers sank all land beneath the waves. Today, only the Kaminoan stilt cities project above the water, forming colonies of varying sizes around the planet.

Kaminoans use domesticated aiwhas for sport and transportation between close-sited colonies. These animals can fly and swim with equal ease, controlling their density using a water-vascular system. This system allows the aiwhas to fill their spongy tissues with seawater when they want to swim underwater, and to wring the water out and shed it to lighten themselves for flight.

Ministerial assistant Taun We serves as a Project Coordinator for the clone army. Taun We has studied human emotional psychology to ensure that the clones are developed into mentally stable individuals. Chief Scientist Ko Sai, serene yet exacting, oversees the clone-army project's biological aspects, ensuring that clones are of the highest quality. She also supervizes the delicate redesign of the genetic codes that make the clones independently intelligent, but preconditioned for obedience. No other scientist in the galaxy could so capably manipulate the genes of another species.

Lama Su is unsure whether Obi-Wan Kenobi's seeming ignorance of the tremendous clone army is a devious test or a complex form of politeness. CLONE ARMY PROJECT EMBLEM

THE MYSTERIOUS Jedi Sifo-Dyas ordered from the Kaminoan cloners a secret army created from a single individual. An agent named Tyranus selected the clone-source: Jango Fett, a man whose natural combat ability and high endurance level would produce the ideal soldier. Under Kaminoan Chief Scientist Ko Sai, the clones' genetic code was altered to accelerate their growth to twice the normal human rate, and their mental structure was subtly reconfigured to make them obedient to authority. Comprehensive training shapes the identity and abilities of the clones throughout their development. The result of this colossal project is an army of identical soldiers produced in a world of clinical efficiency.

The clones begin life as artificially created embryos that are mass-produced in the Egg Lab.

Maintaining Perfection

The Kaminoans strive to control every aspect of the clones' existence for perfect regularity, but slight deviations occur in the development of any living individual's biochemistry. Chief Scientist Ko Sai inspects the clones at every stage of life to identify those who have drifted from the standard. Aberrant clones are given extra conditioning to regularize them.

The Kaminoans' dedication to perfection has led to methods of absolute sterilization and ultraclean surfaces so the clones are not in any way tainted with imperfections. Such standards are extraordinary for so vast an enterprise, and Obi-Wan Kenobi is astonished.

Batches of clones are trained in an environment with exactly enough semblance of community to make them emotionally stable. Physical skills are imparted through learning devices and are perfected through practice.

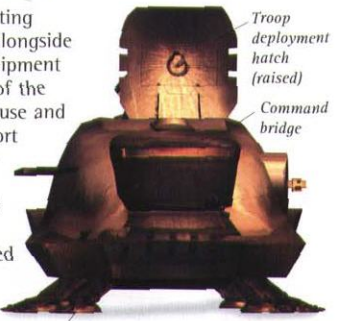
Battle Gear

Vital combat transports and fighting machines have been developed alongside the clone troopers. This new equipment expresses the battle philosophy of the clone army: It is built for heavy use and the unleashing of maximum-effort assaults without warning. These approaches differ from the forms of battle seen throughout the galaxy for thousands of years, in which armies deployed their strength cautiously over long periods.



SPHA-T

Weaponry

Clone troopers are issued plasma guns of two types. Like all standard blaster weapons, these guns create a charged plasma bolt using a small amount of Tibanna gas. Blaster weapons free clone troopers from the need to carry projectile ammunition but are notoriously hard to aim due to the inherent instability of plasma bolts.

Tibanna gas is carried in a replaceable cartridge that lasts about 500 shots, depending on the weapon's settings and traits. Power-charge magazines supply the gun with energy to hyper-ionize the gas into charged plasma in an igniter chamber. The resulting bolt is accelerated out of the gun electromagnetically.

Jango and Boba Fett

ENTRY KEYPAD

THE MANDALORIAN WAY lives on in the bond between Jango Fett and his son Boba. Growing up at his father's side, Boba has learned the value of superior training, judgement, and weaponry. To Boba, Jango stands above the greed and betrayal encountered in the underworld, and is a man of honor who is unfailingly truthful with him. To young Boba, Jango Fett is father, family, ideal, and hero, the greatest of the Mandalorians and the image of his own destiny.

Jango maintains a Spartan apartment on Kamino. He uses it as a safe house for himself and his son, far from the dangerous entanglements of his professional life.

Like Father, Like Son

In Mandalorian tradition, fathers were responsible for training their sons in combat skills. At age 13, boys had to face the trials of manhood. Although these rites could be fatal, actual deaths were extremely rare because candidates were so well prepared. The close father-son bond, built on respect, trust, and discipline, produced highly capable and confident individuals.

Jango teaches Boba to be self-relian and to trust his skills. He also trains the boy to handle dangerous bounty hunting equipment. Exotic armor an advanced starship systems a commonplace elements in Boba's daily life.

Anakin Skywalker built the working skeleton of C-3PO out of scrounged droid parts when he was just a boy and still a slave. THE DANGEROUS AND ELEGANT Count Dooku was once a Jedi Master of great repute. He left the Jedi Order after the Battle of Naboo, returning to his homeworld of Serenno and his family title of Count. By protesting the failure of galactic government, Dooku has swayed many systems to the Separatist movement, which seeks independence from the Republic, but his r motives lurk in darkness. The Count has always wielded considerable power—by natural authority, by lightsaber, and now by wealth and persuasion. Th double-dealing master of the Force has taken a place at t heart of galactic ever and he threatens the very survival of the Republic.

Dark Alignment

Although Dooku joined the Order a the usual age, he never fully gave it his inmost allegiance. He maintaine a streak of independence, which he transmitted to his pupils, including the late Qui-Gon Jinn. Dooku's considerable strength in the Force made him enigmatic even to Yoda, and there were whispers that he experimented with Sith teachings, using a dark Holocron kept in the J Archives. The Council underestimate Dooku's interest in power.

DATA FILE

◆ The Count is master of his family's fortune and one of the wealthiest men in the galaxy. He could field an army on his own resources.

◆ Dooku's teacher was Yoda. The great Jedi Master hoped, with careful teaching, to overcome the effects of Dooku's persistent independent spirit.

Dooku's Lightsaber

As a Jedi Master, Count Dooku set aside the lightsaber he built as a young Padawan and created a superior one, as Jedi sometimes do. In creating his personalized design, he chose a configuration that had no connection to that of his master, Yoda, nor to the style in fashion at the time. Instead, he studied Jedi Archives records to create a lightsaber of the type that was standard in the heyday of Form II lightsaber combat. Form II is an ancient technique that favors long, elegant moves and incredible deftness of hand.

The Lost Twenty

Only 20 individuals in the history of the Jedi Order have ever renounced their commissions. Their leave-taking is sorely felt among the Jedi, who memorialize them with portrait busts in the Archives. Count Dooku is the most recent of the "lost" ones. He is considered the most bitter loss because the Force was so strong in him.

The curved hilt of Dooku's lightsaber allows for superior finesse and precise blade control. This design gives Dooku an edge when facing Jedi, who have mostly trained to use lightsabers to deflect blaster bolts.

Sun Fac

Poggle's chief lieutenant, Sun Fac, ensures that his master's will is done throughout Geonosis. Unusually intelligent and creative for a Geonosian, Sun Fac is adept at playing whatever role will best accomplish the needs of the moment. He may be a sympathetic listener or a heartless executioner, depending on which will increase productivity.

Poggle the Lesser

The Stalgasin hive colony ruled by Archduke Poggle the Lesser currently controls all the other major hives on Geonosis. Poggle has negotiated with outworld interests and coordinated widespread planetary hive efforts on the largest industrial projects ever undertaken by Geonosian society—the building of colossal numbers of Battle Droids for the Trade Federation and their Separatist allies. The tremendous income from these projects has secured Poggle's power, but this situation could change, as it has done in the past. The infighting rife in Geonosian society usually makes clients reluctant to place large orders.

Common on both Geonosis and neighboring Tatooine, massifs are emblems of authority for Geonosian aristocrats, who keep them as pets. Massifs also rid the hives of vermin in return for safety from predators outside.

Jedi in Battle

JEDI KNIGHTS use their powers of subtle perception to resolve conflicts through negotiation and diplomacy. They seek peace through justice, knowing that true harmony can rarely be forced upon a situation. Nonetheless, mystical philosophy has never blinded the Jedi to the practical need for force in intractable situations, and the most studied Jedi diplomats are capable of drawing their lightsabers in an eyeblink when crisis demands it. When war preparations are discovered on Geonosis, Mace Windu is quick to act, leading a Jedi expedition of all available fighters to rescue Obi-Wan Kenobi.

Lightsaber Combat

THE LIGHTSABER is a powerful symbol of discipline as well as a weapon. In the hands of the untrained, the lightsaber is worse than useless against modern blasters, and may even injure its user. But in the hands of a Jedi, the lightsaber can become as powerful as any weapon turned against it, deflecting energy bolts back at attackers in a deadly hail and leaving the Jedi wielder untouched. In its highest form, lightsaber combat becomes a subtle and intricate art, but every Jedi begins by learning its first principles.

Seven forms of lightsaber combat have been developed since the foundation of the Jedi Order. Each represents a distinct approach or philosophy, and has its particular strengths. VELOCITIES
To develop lightning reflexes and tight control, Jedi face each other in drills called velocities. The tenth velocity sequence takes each opponent through a series of attacks and parries and is repeated in turn at ever greater speed until one opponent is felled or yields with the declaration, "Solah!"

Foundations

Jedi in training run lightsaber velocities endlessly to increase their key skills and physical stamina. Building on these basics, Jedi can go beyond what is physically possible, allowing the Force to flow through them. A Padawan practices for the trials of passage using dulon: Solo sequences of moves in which the opponents are only envisioned. The patterns of velocities and dulon prepare a Jedi for the unpredictable realm of live combat.

Acknowledgements

A tiger team of authorities and experts behind the scenes contributed greatly to this book with consultation and creative input. It is my pleasure to thank in particular:

Prof. Greg Aldrete of the University of Wisconsin Green Bay, for his work on the role of communication in building the power of an emperor; FBI Special Agent Matt Bliss, for his first-hand information on real-world bounty hunters, military training, and indoctrination approaches; Fencing master and swordsman extraordinaire Jack "Tony" Bobo, Esq., for developing the principles of lightsaber combat. (Whom else could I have called who would already have had his sword lying out and ready?); "Jedi" Steve Drago, for assistance in studying and practicing lightsaber moves; Stunt Coordinator Nick Gillard, high saber-master of the Jedi Temple, for explaining his nuanced work in creating prequel lightsaber combat, and for personally training me on-set in one of his fight sequences; Prof. Mark Spencer of the University of Colorado, for anthropological consultation on the Tusken Raiders; Designers Iain Morris, Guy Harvey, and Nick Avery, who produced inspiring layouts of bold and aggressive design; DK Editor Simon Beecroft, for his vital organizing influence and his keen and constructive editorial eye; Master photographer Alex Ivanov, who captured the beautiful image of the "unshootable" 90-facet Great Holocron. (As Don Bies has observed, the man truly paints with light); ILM master modelmakers Don Bies and John Goodson, for the precision-crafted Holocrons and the clone trooper rifle cutaway; Lucasfilm master sculptor Robert Barnes, who created creature models for this book that looked real enough to bite us; John Kelly, for digital manipulation on the clone trooper rifle cutaway and artwork for the lightsaber combat sequences; digital work Fyberdyne Laboratories' Ed Endres, whose superb work made it possible for me to explore the experience of wearing full body armor like a clone trooper; Cynthia O'Neill Collins and Cathy Tincknell at DK for kindly supporting the effort it took to make this project happen.

And as always the team at Lucasfilm: Lucy Autrey Wilson, for encouraging backstory coordination to make this project the best it could be; Jonathan Rinzler for braving new territory with us; Howard Roffman for an enjoyable evening discussion on the nature of Sith evil.

Finally, to my supportive family, particularly my brother Michael Reynolds in whose comfortable home I wrote the last of this text between visits to White Castle and the emergency room.

DK Publishing would also like to thank: Sue Rostoni, Chris Cerasi, Steve Sansweet, Leland Chee, Stacey Cheregotis and Chris Gollaher, for approvals.
